April 21, 2026, was the hardest day of my life. Although you had an incredible 95 years on this planet, I still wish we had more time with you.

You lived an incredible life, surrounded by the people you loved and those who loved you. You immigrated to Canada at the age of 17, where you built and ran restaurants and hotels that were beloved by the community. You even have a street named after you and our family in Medicine Hat, Alberta. You also got to see your children and grandchildren get married, and you were able to meet two of your great-grandchildren.

I hope I made you proud over the past 33 years. I miss you every day.

I love you, Yeye.

Nick Chow
